

Multiplication Jenga

Object

Play the classic jenga block building game and build the blocks until you can build no more and the tower tumbles down.

Setup

Stack blocks in rows of 3 each, build up until all blocks are used, mix the blocks so that the numbers are random.

Playing the game

Throw both dice and multiply the dice. The result of the dice is the number on the block you need to remove and stack on top of the already stacked blocks. Only blocks below a complete level may be removed.
