

## Shut The Box – Game Rules

### Object

The object of the game is to attempt to shut the box by throwing dice and dropping numbers on the board that equal to the amount on the dice until there are no numbers on the board left standing.

### Setup

Simply ensure all numbers are in the upright and visible position before any players turn. Everyone must agree on a score limit. Any player that goes over this score limit is eliminated from the game. A good general score limit to use is around 100 - 300 but any number will work. The larger the number, the longer the game.

### Playing the game

Each player resets the numbers on the board before their turn so that they are upright and visible.

They must then roll a pair of dice into the board and add the numbers they get. Players must use both dice unless they have dropped the 7, 8, and 9 numbers on the board, in which case they may choose to use either 1 or 2 dice.

Players must drop the numbers on the board that add up to the amount from the dice. This is done until the player cannot drop any more numbers on the board. The remaining numbers are then added up and added to the players score. If their score goes over the agreed score limit, they are eliminated from the game.

If the player manages to drop all the numbers on the board, they have SHUT THE BOX and their score is reset back down to 0. The winner of the game is the last player that has not gone over the score limit.
