

## Quoits (RingToss) – Game Rules

### **Object**

Players take turns to throw the rope quoits from the throwing position to try and hook them over the scoring pegs.

### **Setup**

Once the board/ base is set up you'll need to decide upon a few rules. The first being how much distance each player should take before throwing a ring. In traditional games players usually have to be at least 3 meters away from the board before throwing.

### **Playing the game**

Each peg has different number of points, the first player to reach 21 points is the winner. The throwing distance in quoits game is around 3 meters, so each player must throw from behind the 3 meters line. If you want to make it more challenging then, you may increase the throwing distance.
